Editorial

Dear donors,
Dear friends of ETH,

The term “community” is rather overused nowadays, but the researchers and students at ETH Zurich, together with their donors, can rightly be described as such. This is because together they form a vibrant community with many shared interests and values. At ETH Foundation events, we witness the lively exchanging of ideas and the sharing of inspiration among members of this community and we hear about this in many anecdotes and success stories throughout the year as well.

Yet you, our highly valued donors, are very different personalities: you may be young, aspiring start-up founders or prominent, well-established business-people. You may be former Excellence Scholars, who are now young professors, or retired professors who still play an active role in the academic world. There is even an Olympic gold medallist among you. Take a look at the portraits in the report if you want to find out who this is. What brings you, our more than 7,000 donors and partners, together, despite your age differences and varying interests, is your understanding of the importance of science and research, your belief in our talented people and your commitment to them.

We count ourselves lucky to have you as members of our community. You make it possible for us to achieve more in our research and teaching at ETH: more support for outstanding, talented people, a more strategic perspective and, finally, more stellar moments in science. Like ETH Zurich, you are putting yourselves at the service of society. For this, you deserve our heartfelt thanks.

We hope you enjoy reading the report.

Professor Pius Baschera
Chair of the Board
of Trustees

Professor Joël Mesot
President of ETH Zurich,
Vice Chair of the Board
of Trustees

Dr Donald Tillman
Managing Director

Highlights 2024

The commitment of our donors and partners over the last year has shaped the development of ETH Zurich in a wide range of different areas, from support for talented students through to ground-breaking innovations in robotics and inspirational new ideas for the food industry.

Prize winner Marco Hutter with Max Rössler and the ANYmal walking robot.

Pioneering work in robotics recognised

Marco Hutter's work on the mobility and autonomy of AI-controlled walking robots has fundamentally changed the course of robotics research and, at the same time, has helped to position ETH Zurich as a world-leading institution in the field of robotics. Marco Hutter was awarded the Rössler Prize for his pioneering scientific achievements and also for the high standard that he has reached in technology transfer, entrepreneurship and project initiatives. This is the most generous research award at ETH with a value of CHF 200,000. It is funded by a donation from ETH alumnus Dr Max Rössler.

ETH President Joël Mesot, Andréa M. Maechler, Walter Fust and Rector Günther Dissertori (from left to right) on ETH Day 2024.

Andréa M. Maechler and Walter Fust honoured

ETH Zurich appointed Andréa M. Maechler and Walter Fust as Honorary Councillors. Andréa M. Maechler, Deputy General Manager of the Bank for International Settlements (BIS) and former member of the Governing Board of the Swiss National Bank, was appointed Honorary Councillor for her great commitment to promoting technology transfer to the economy, in particular in the field of Computer Science, and for acting as a role model for women in management positions. ETH alumnus Walter Fust, founder of Dipl. Ing. Fust AG and Vice Chairman of the Board of Directors of the StarragTornos Group, was honoured for his pioneering spirit, his entrepreneurial achievements, his long-term commitment to students with entrepreneurial ambitions and for being a role model. Walter Fust passed away on 4 February 2025. ETH Zurich and the ETH Foundation will honour his memory.

Strengthening the healthcare system with the help of AI

Bosch Health Campus (BHC) and ETH Zurich are pooling their expertise to forge ahead with innovative AI-based solutions for the healthcare needs of tomorrow. Together, the two institutions aim to develop patient-centric solutions to make healthcare more efficient, more personalised and accessible to all. The first step towards a long-term partnership is the establishment of the BHC Fellowship Programme at the ETH AI Centre in Zurich and the Bosch Health Campus in Stuttgart.

Support for around 200 talented young people

With substantial support from donors, foundations and companies, many talented young people at ETH are working towards achieving their ambitious goals. In 2024, 117 students from financially disadvantaged backgrounds were supported with needs-based scholarships, 58 outstanding Master's students benefited from an Excellence Scholarship and 13 innovative young entrepreneurs were given access to infrastructure, mentoring and start-up funding via the Pioneer Fellowship programme.

Samuel Kunz from the RSL team at ETH Zurich with his assistant.

Seeing-eye canes and robotic guide dogs

In 2024, 67 teams from 24 countries competed in the Cybathlon at ETH with the aim of winning the event and also introducing practical assistance technologies that are suitable for everyday use. The third staging of the competition for people with disabilities and experimental assistance technologies was a resounding success. Long-standing partners such as Maxon Motors AG and all the donors who support the Cybathlon, including the Swiss Re Foundation, the Stiftung NAK-Humanitas, the Federal Bureau for the Equality of People with Disabilities (FBED), the Armin & Jeannine Kurz Stiftung, the MBF Foundation, the Ursimone Wietlisbach Foundation, the Joh. Jacob Rieter Stiftung and many other dedicated foundations and individuals all made a major contribution to the success of the Cybathlon.

Foundation enables a Life Sciences Makerspace

A generous donation from the Georg H. Endress Foundation allows ETH to add a Life Sciences Makerspace to the Student Project House. This gives students of chemistry and biosciences the opportunity to pursue their creative ideas outside the curriculum and to develop their project-related skills.

One of around 160,000 outstanding works in the Graphische Sammlung ETH Zurich: Distelalp am Saasthale by Gabriel Lory (known as Lory fils); Gabriel Lory (known as Lory père), around 1830.

Discovering art at the click of a mouse

The Graphische Sammlung, the prestigious and wide-ranging collection of art on paper at ETH Zurich, is gradually being catalogued and digitised. Thanks to generous support from the Ernst Göhner Foundation, the Georg and Bertha Schwyzer-Winiker Stiftung and the Stiftung Familie Fehlmann, since 2020 a digitisation team has been working exclusively on making high-profile artworks by artists ranging from Albrecht Dürer to Pablo Picasso available online.

Explore the Graphische Sammlung online

The combined power of three industrial partners

Nutritious foods that can be stored and transported safely are critical in ensuring that the world's growing population can be fed. ETH is constantly making progress in this important field of research. Support is provided by the three Swiss companies Bühler, Givaudan and Nestlé in the form of start-up funding for a new professorship in food processing engineering and nutrition. The promising new holder of the professorship is Patrick Rühls, who has extensive experience in research and industry.

Looking ahead

Encouraging close interaction with society and pushing ahead with bold reforms: ETH President Joël Mesot gives an insight into the plans for ETH Zurich in 2025.

What will ETH Zurich be focusing on this year?

In times of global uncertainty, we need institutions that forge connections and promote dialogue. We see ourselves as bridge builders – between different disciplines, but also between science, industry and society. One example of this: with the new School of Public Policy, we are laying the foundations for improving the interaction between the worlds of science and politics and promoting informed decision-making in an increasingly complex world. The Swiss National AI Institute (SNAI) is another ground-breaking project: it pools the expertise of ETH and the Federal Institute of Technology Lausanne (EPFL) not only to develop artificial intelligence further from a technological perspective, but also to ensure that it is used responsibly. The goal is to create a research environment that positions Switzerland as a location for trustworthy, reliable and transparent AI.

What innovations are planned in the field of teaching?

For many years, the teaching at ETH has been of a very high standard, due to the large number of reforms that have been introduced, both major and minor. However, this has resulted in some cases in courses that are too intensive and a highly complex teaching and examination schedule. We have reached the point where we need a fundamental reform of the basic conditions so that we can develop our teaching content and methodologies further. On the one hand, we plan to make modifications to the academic calendar. On the other, we will focus more closely on project- and problem-based learning in the future, for example by enabling students to work with companies to test their innovative ideas in a real-life environment.

Funding for Swiss universities remains an important topic. What is the perspective on the debate at ETH?

We started the autumn semester of 2024 with 13 percent more Bachelor's students than in the previous year. This figure is a very positive development for ETH and for the economy, where our graduates are highly sought-after. The growing demand for an outstanding education and, at the same time, the limited funds available naturally present us with challenges. A wide-ranging discussion is needed to safeguard the foundations of a sustainable education system. One thing is clear to me: education must not be allowed to become a luxury. It is a central component of Swiss culture and innovative ability. I myself would not have been able to study at ETH if the tuition fees had been three to four times higher at the time.

What role does philanthropy play?

The generous support of, and our long-term partnerships with, our donors are crucial, in particular at a time when the financial circumstances are changing. Philanthropy is essential because it allows for innovative projects that require more than the basic funding. From scholarships for particularly talented students and ambitious young entrepreneurs through to support for key initiatives such as the School of Public Policy – all the support we receive takes us one step closer to a world worth living in for future generations.

“It’s wonderful to have a top-tier university on your doorstep and to be able to create opportunities for its young talent to develop.”

Marina and Steffen Meister

ETH brought Marina and Steffen Meister together – and has not let go of them. They have passed on their enthusiasm for their alma mater to their sons, who also study at the university, and as members of the Escher Circle, Marina and Steffen Meister also support outstanding research and talented people at ETH.

Find out more

Complex puzzles and creative and logical thinking have been a source of excitement for Georgette Weingärtner since she was a child. The computer science student is passionate about cryptography. Thanks to the Excellence Scholarship that she has been awarded, she is able to take part in a research project during her Master's and explore where her strengths lie. Georgette Weingärtner is not only committed to a more secure cyberspace, but also to supporting young talent. By giving presentations in schools, she aims to inspire the next generation and, in particular, girls to study in her field.

Find out more

“ETH has given me so much. For me it’s a no-brainer to give something back.”

Joel Roos

Not long ago, Joel Roos was investing every spare minute in his own ETH spin-off. Despite the total commitment of its three founders over a period of two years, the fitness app VAY was on the brink of collapse. But a strategic refocus ultimately led to the turnaround that they had hoped for and VAY was bought by the US firm Nautilus. Now Joel Roos is supporting young entrepreneurs as both a philanthropist and an investor so that they can turn their visions of successful start-ups into reality.

Find out more

A well-functioning transport system is an essential pillar of a liveable city. Grace Kagho has developed UrbanEcho with the aim of achieving this for rapidly growing cities in low- and middle-income countries. With the support of a Social Impact Pioneer Fellowship, she is developing digital twin models. They make it possible to take a snapshot of the mobility behaviour, the living situation or the energy consumption of the inhabitants and allow for the sustainable planning of cities where future generations will actually want to live.

Thank you

We would like to express our sincere thanks to you, our valued donors and partners, for your commitment and for the confidence you have shown in the ETH Foundation. Our gratitude also goes to all those donors who prefer to remain anonymous.

“The NOMIS Foundation primarily supports people; people who are curious, who ask questions and who have the inner drive to discover and understand things.”

Markus Reinhard, Managing Director

The NOMIS-ETH-Fellowships enable young scientists to pursue their research into the origins of life at the ETH Centre for Origin and Prevalence of Life.

“Places like the Student Project House are fuelling a spirit of enquiry and I am convinced we can use them to initiate a great deal.”

Tonia Weibel, Educator

The daughter of former President of the ETH Foundation Ulrich Bremi supports the planned Centre for Students and Entrepreneurs.

Private donors

* Special thanks go to the Excellence Circle donors who, by contributing annually for more than five consecutive years, have provided sustained support for teaching, research and talented young individuals at ETH Zurich.

“I am very grateful for the education I received at ETH, which significantly influenced my professional development. It feels good to give something back.”

Robert Schwarzenberger, ETH alumnus

By including the ETH Foundation in his will, the IT project lead is committed to ETH Zurich beyond his lifetime.

“Young talents who are eager to tackle global challenges with their technical expertise deserve our full support.”

Vera de Vries, ETH alumna

The engineer supports talent programmes.

“I feel privileged to be able to help ETH offer targeted support for excellent young researchers.”

Eilif Holte, ETH alumnus

The successful software entrepreneur supports talent.

Named funds

By setting up a named fund, donors can provide long-term support for a cause close to their heart or for ETH Zurich in general. Our heartfelt thanks go to those people who are supporting teaching and research at ETH in this way.

The Dr. Alfred und Flora Spälti Fonds enables research in the fields of electrical engineering, energy research, communications and physics.

The Amon Marxer Fonds zur Förderung der Wissenschaft funds research into artificial intelligence.

The Else und Friedrich Hugel Fonds supports projects and students in the fields of mechatronics, power electronics and drive technologies.

The Emil Halter Fonds funds projects in the field of digital teaching and educational technology.

The ETH Zurich Scholarship in Peace Mediation Fund supports participants of the MAS ETH Mediation in Peace Processes.

The Hans Item Fonds supports the Excellence Scholarship programme.

The Max Rössler Fonds supports outstanding ETH professors.

The Nagoli-Fonds supports students from financially disadvantaged backgrounds by providing them with needs-based scholarships.

The Peter und Waltraud Betsche-Fonds enables projects in the field of architectural history.

The Projektfonds für Energie Prof. Wokaun funds energy research.

The Rector's Impulse Fund, set up by Adrian Weiss, supports innovative short-term projects in teaching.

The RUMOR Fonds enables research in the field of plant physiology, plant biochemistry and plant genetics.

The Spickenreuther Fonds supports students.

The Thallos Fonds, set up by Lucien Trueb and Yoshiko Yasukawa, funds research in the fields of chemistry, physics and material sciences.

The Ursula Himmel-Glarner Fonds supports outstanding Master's students.

The Dr. Walter und Edith Fischli Fonds enables research in the field of lymphoma.

Escher Top 100 Circle

A special thanks goes to the members of the Escher Circle. The Circle brings together people who provide long-term support that helps ground-breaking projects and outstandingly talented people at ETH Zurich to make progress. Impetus in the field of artificial intelligence with the support of the ETH AI Center, a focus on sustainable energy with start-up funding for professorships, such as Solar Energy Engineering, and support for the completion of Tor Alva, the White Tower in Mulegns, which sets new standards for computer-based design and digital manufacturing (photo): the members of the Escher Circle are making a major contribution to the future viability and innovative strength of ETH Zurich.

Beyond their lifetime

Hedwig and Peter Stauffer-Huber, around 1960

Hedwig and Peter Stauffer-Huber

Hedwig and Peter Stauffer-Huber led modest and dedicated lives, carefully using their own resources while at the same time showing generosity to friends and family. Hedwig Stauffer-Huber was a skilled craftswoman. With her dressmaking skills, she often designed clothes for members of the family. She made all her clothes herself, including the ballgown in the photo. Peter Stauffer-Huber was a fire prevention specialist in the buildings insurance department of the canton of Bern. Through his work, he came into contact with ETH and, in particular, with Professor Mario Fontana (now an emeritus professor) from the Department of Civil, Environmental and Geomatic Engineering (D-BAUG), who specialised in the fire simulation of buildings. After the death of her husband, Hedwig Stauffer-Huber decided, at the suggestion of her nephew, Professor Lorenz Hurni from D-BAUG, to leave a legacy for talented young people at ETH. Thanks to her far-sighted commitment, Excellence Scholars at D-BAUG now benefit from this support.

Bruno Meyerhans

The theologian dedicated the majority of his life to people affected by poverty and stood by their side, advocating for human rights and peace. With his bequest in favour of ETH Zurich, Bruno Meyerhans continues to work for the common good.

We would also like to express our appreciation to the bereaved families of Rolf Jeltsch und Erich Stuhltraeger, whose commitment to supporting ETH in their memory continues a connection that extends beyond their lifetimes.

Our gratitude also goes to all the other people who have supported ETH Zurich with their legacies via the ETH Zurich Foundation.

Hans Egger

His life as a civil engineer fulfilled him. He expressed his gratitude for his studies at ETH Zurich and the career it enabled him to pursue in his legacy.

“I want to support the next generation, and to do so where it truly makes a difference.”

Walter Fust

Before Walter Fust set up his successful company Dipl. Ing. Fust AG, he studied mechanical engineering at ETH Zurich. When he completed his studies in 1964, he was one of the youngest ever graduates. He remained close to the university and, through his commitment to the Pioneer Fellowship programme, he supported the entrepreneurial spirit and activities of ambitious young entrepreneurs for several years. In 2024, Walter Fust was appointed Honorary Councillor by ETH (see page 6). The far-sighted entrepreneur passed away on 4 February 2025.

Find out more

The Pioneer Fellows Stefan Villiger and Reto Togni plan to revolutionise manual wheelchairs with their new steering system. Intuitive steering through the body reduces the strain on the shoulders, saves energy and leaves one hand free. The young entrepreneurs and their start-up Versive are being supported and advised by the former Excellence Scholar and movement scientist David Mzee, who as an early tester is convinced of its potential.

Find out more

“It is important to me to keep excellent education accessible, by having low fees and scholarships.”

Dominique Gisin

The Olympic medallist and ski racer Dominique Gisin applied to study at ETH Zurich on the day of her official retirement. Dominique Gisin's stamina, determination and passion ensured her success during both her elite sporting career and her degree in physics. With her philanthropic support, she aims to open up opportunities for other talented people and to give a boost to top-class research.

Find out more

The technology developed by Chiral, an ETH spin-off which is based on a research project supported by Empa, ETH and EPFL, is opening up new opportunities for the use of nanomaterials in the semiconductor industry. With the help of a Pioneer Fellowship, Natanael Lanz and his co-founders have their sights set on the key players in the computer chip industry. They want to ensure that chips based on nanomaterials, which are both more efficient and more economical, can be produced in the future for commercial use.

Find out more

Funding opportunities

Donations to the ETH Foundation play a major role in increasing the capacity of ETH Zurich for innovation and in enabling ground-breaking solutions to be developed for global challenges.

Strategic projects in teaching and research

The ETH Foundation supports top-class research and excellent teaching at ETH, thus contributing to the development of solutions to the most pressing challenges of our time and strengthening Switzerland's position as a hub for knowledge and business. Making a general, non-earmarked donation allows the university the greatest possible flexibility. ETH can, for example, create new professorships or support exceptional research projects.

Focus on a particular topic

An earmarked donation allows you to support specific strategic projects at ETH. Are you passionate about supporting excellent students or researchers with entrepreneurial ambitions at ETH? Do you want to enable innovation in a particular research field such as climate change, sustainable food systems, healthy ageing or quantum research? The ETH Foundation will be happy to help find the engagement that suits you best.

Support in your name

You can provide long-term support for a cause close to your heart or ETH in general through a named fund. We will set up a fund in your name, for your chosen purpose, e.g. the "Joanna Smith Fund for the Promotion of Excellent Female Students" or the "John Smith Fund for the Promotion of Climate Research". We will provide regular updates on supported projects and the fund's finances. We will also give your named fund the level of publicity you wish.

Making an impact beyond your lifetime

By leaving a legacy or bequest to the ETH Foundation, you can make a lasting commitment to those topics and values that are particularly important to you – from a commitment to excellent talent to the promotion of a specific field of research. This way, you create a memento of your life and make an effective contribution to a brighter future.

Bequeathing property

Your emotional attachment to your home tends to grow over the course of a lifetime as it becomes a place of life-defining experiences and milestones. This makes it all the more understandable that you want to know that your property will be in good hands when you are no longer around. As a reliable partner, the ETH Foundation ensures that donations, legacies or bequests of property are handled professionally. Together with Immobilien ETHZF AG, a wholly owned subsidiary of the ETH Foundation, set up specifically to manage real estate on behalf of ETH Zurich, we will ensure that your interests and wishes are respected.

In memoriam donations

If you prefer not to mark a loved one's passing with flowers or wreaths, you can make a memorial donation to the ETH Foundation instead.

Maximum impact

As a charitable organisation, the ETH Foundation is exempt from inheritance and gift tax and donations are tax-deductible under the provisions of the law. In addition, its operating expenses are funded using the capital income from all its managed assets. This way every donation benefits ETH Zurich in full.

**Board of Trustees
ETH Zurich Foundation**

1 Professor Pius Baschera
Chair
Former speaker for the Martin Hilti Family Trust
→ President of the Steering Committee

2 Professor Joël Mesot
Vice Chair
President of ETH Zurich
→ Vice President of the Steering Committee

3 Daniela Bosshardt
Former Chair of the Board of Directors, Galenica
→ President of the Investment Committee

4 Heinrich Fischer
Former Chair of the Board of Directors, Hilti Corporation

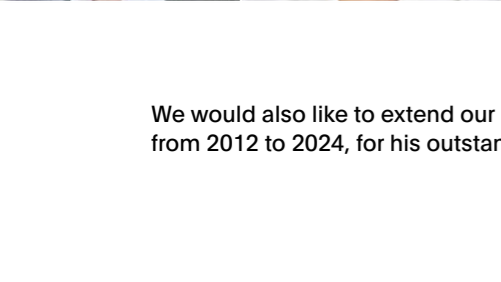

5 Dr Paul Hälg
Chair of the Board of Directors of Dätwyler
→ President of the Allocation Committee

Report of the independent auditor to the Board of Trustees of ETH Zurich Foundation, Zurich

The accompanying summary financial statements, comprising the summary balance sheet and the summary income statement as at 31 December 2024 for the financial year then ended (pages 41 and 42), are derived from the audited consolidated financial statements of ETH Zurich Foundation, Zurich for the year ended 31 December 2024. We expressed an unmodified audit opinion on those financial statements in our report dated 10 March 2025.

The summary financial statements do not contain all the disclosures required. Reading the summary financial statements, therefore, is not a substitute for reading the audited financial statements of ETH Zurich Foundation, Zurich.

Responsibility of the Board of Trustees

The Board of Trustees is responsible for the preparation of a summary of the audited financial statements.

Auditors' responsibility

Our responsibility is to express an opinion on the summary financial statements based on our audit procedures, which were conducted in accordance with Swiss Auditing Standard 810 "Engagements to Report on Summary Financial Statements".

Opinion

In our opinion, the summary financial statements derived from the audited financial statements of ETH Zurich Foundation, Zurich for the year ended 31 December 2024 are consistent, in all material aspects, with those financial statements.
